

HACKTERIA.ORG

Open Source Biological Art

Hackteria goes ZKM: Participation at Education Program

a project by

International Hackteria Society

In den mittlerweile 6 Jahren seit der Gründung von "Hackteria | Open Source Biological Art" hat sich ein globales Netzwerk entwickelt, welches mit einem Ansatz der radikalen Transdisziplinarität, wie auch einer Offenheit zum Amateurismus in der Auseinandersetzung mit Themen der Biologie durch künstlerische, wissenschaftliche und DIY (do-it-yourself) Praktiken widmet. Ein Schwerpunkt des Projektes ist es über die Website hackteria.org einen niederschweligen Zugang zu schaffen für Künstler, Hacker / Maker, Forscher und Pädagogen sich ein Know-how anzueignen um selbstständig in einfachen und selbstgebauten Heimlaboren mit Biotechnologie, Umweltanalytik und Genetik zu experimentieren. Im Rahmen von 1-2 wöchigen Veranstaltungen, das HackteriaLab 2010 - 2014, trafen sich regelmässig eine Vielzahl von internationalen Teilnehmer, um gemeinsam in kollaborativer Praxis an neuen Projekten zu tüfteln, ihr Wissen durch Workshops und Präsentationen untereinander und mit der Öffentlichkeit zu teilen und durch interdisziplinäre Zusammenarbeit eine gemeinsame und konstruktive neue Sprache und Methodik zu finden.

Over the last 6 years since the initiation of "Hackteria | Open Source Biological Art" a global network has been established, which works on various themes of lifesciences and biology with a radically transdisciplinary approach and openness to amateurism, through artistic, scientific and DIY (do-it-yourself) practices. One of the core activity is to create access to that know-how through the website hackteria.org enabling artists, hackers, makers, researchers and educators to independantly work and experiment through simple and self-made instruments in their home laboratories/studios on topics of biotechnology, environmental monitoring or genetics. Within the Hackteria framework, the HackteriaLab (2010 – 2014), an international two weeks immersive and collaborative format, plays a key role in experimentation and the development of new projects, sharing of knowledge through workshops and presentations among the participants and a wider public audience, and defining a common constructive language and new methodologies for interdisciplinary collaborations.

Update Oktober 2015 „Fokus: Workshops“

Overview Workshops by Hackteria @ ZKM

Workshops – throughout the program

Overview

Workshops on bio art and DIY biology could be held throughout the whole program of <GLOBALE: Exoevultion> selected through the hackteria network in coordination with the ZKM education department. With it's strong focus on the development of new workshop methodologies at the art/science interface, the hackteria network could provide an interesting series of workshops, mentors will be selected through an open call among the hackteria network.

Suggested topics: DIY Microscopy, Bio-Cyber Kidzz, Art of Fermentation, BioElectronix, NanoHacking and many more.

See online living document: http://hackteria.org/wiki/Hackteria_Workshops_in_ZKM_2016

BioCyberKidzzz

Zielgruppe 1: Kinder (5 - 15)

Dauer als Workshop: 1 – 2 Tage, auch also Halbtage verteilt auf eine Woche

~~Cancelled: Ideale Dauer als Walk-in-Lab: 4 – 5 Tage~~

Hacking the human body has become commonplace and many people have body modifications such as tattoos, piercings or even advanced medical prosthetics. Simple and playful body hacks that allow enhancing our human performance can be made with just few and cheap materials, such as cardboard, magnets and LEDs. In this playful laboratory setting we will investigate with the children: hearing with a Bio-Acoustics Ear and hacking their touch perception by the Magnetic Finger or a Disco-on-a-Fingertip and finally explore a Photosynthetic Skin.

NanoHacking: Convergence of Life and Tech at the Nanoscale – A Hands-on Introduction for Students

Zielgruppe 1: Junge Erwachsene und Studenten (16 -25)

Dauer: 4 Tage, verteilt über 2 Termine

During this course, the students will be introduced into the merging disciplines of of art, science and engineering that meet at the nanoscale. But what is nanotechnology? It promises huge beneficial impact on global health, sustainable energy and novel materials. At the same time utopian visions, science-fiction scenarios and fundamental fears are clashing at discussions in society. Throughout the course, we will lift the fogs of these superficial discussions and through hands-on activities get closer to grasp the world of the small. We will build our own simple DIY (do-it-yourself) optical and electronic instruments to learn more about nanoparticles and nanosensors, how to "see" them, how to "hear" them.

One key aspect of the nanosciences is the fact that the traditional disciplinary borders of physics, biology, engineering, to name a few, are merging. With the current tools and methods of understanding matter on the smallest scales of atoms and molecules, only a true collaborative and transdisciplinary approach can lead to new insight, application and constructive discourse of its societal implications.

Other Options for future workshops

DIY Microscopy (maybe at another time in spring together with the local ZKM edu Team)

Zielgruppe 1: Kinder und Jugendliche (12 -18)

Ideale Dauer: min 1 Tag für nur Mikroskop. 2-5 Tage als Teil anderer Themen, Umwelt, Biodiversität, Bodenmessungen

Mehr: http://hackteria.org/wiki/DIY_microscopy

Anleitung: <http://hackteria.org/wp-content/uploads/2013/05/hm3-hackteria-pages.pdf>

Educational Training „J'aime art/sci workshopology“

Zielgruppe: Internes ZKM Education Team / Lehrerfortbildung

Dauer: 2 Tage

Case Study „DIY Microscopy“ Bau und hack des DIY Mikroskopes, Diskussionen und Beispiele über Integration in Unterricht, process over product, Kit-Without-Parts. http://hackteria.org/wiki/J%27aime_DIY_Microscopy

Case Study „BioElectronix“, will be updated on the wiki

Case Study „BioCyberKidzz“, see wiki

Case Study „The Art of Fermentation or How to Make Cheese and Wine“, see wiki

BrainHacks and Playing with Perception

Zielgruppe 1: Kinder und Jugendliche (8 -20)

Rubber Hands, Dream-Machines, Fish-Hacks and more

Mehr: http://hackteria.org/wiki/Fish-to-Brain_Interfaces,_Antony_Hall,_Ljubljana

Hacking Plants - ...and hear them

Zielgruppe 1: Kinder und Jugendliche (12 -18)

Ideale Dauer: 1 Tag

Einfache Elektronik in Verbindung mit Pflanzen.

Mehr: http://hackteria.org/wiki/PIFcamp_Plant_Analyzer

Video: <http://hackteria.org/workshops/reflections-on-biosense-dudu-nanosmano-zivisistemi-2012/>

Zielgruppe 2: Junge Erwachsene und Studenten (16 -25)

Ideale Dauer: 2 Tage nur Basteln und Experimentieren oder...

Long Version: 5 Tage inklusive Einführung in Arduino und allgemeine Biosensorik

Mehr: http://hackteria.org/wiki/Plant_Electrophysiology

The Art of BioHacking or How to Make Wine and Cheese – A Hands-on Introduction for Students

Zielgruppe 1: Junge Erwachsene und Studenten (16 -25)

Ideale Dauer: min 4 Tage, eventuell verteilt über 2 Termine

Mehr: http://hackteria.org/wiki/The_Art_of_BioHacking_-_HEAD

Budget

Summary	#	time/work per unit	Cost
1-2 days Workshop for children (max 15 participants)			
Travel Expenses Dusseiller, Zurich, depends on scheduling	0	300.00	0.00 €
Travel Expenses in Europe (1 Extra Mentor)	2	400.00	800.00 €
Preparation / Pauschale	1	200.00	200.00 €
Mentor fee/day (calculate if you want more days)	1	650.00	650.00 €
Assistant fee/day (calculate if you want more days)	1	350.00	350.00 €
2nd Assistant by ZKM	1	0.00	0.00 €
Materials	1	300.00	300.00 €
Total			2,300.00 €
4 days Workshop for young adults & students (max 15)			
Travel Expenses Dusseiller, Zurich	1	300.00	300.00 €
Travel Expenses in Europe (1 Extra Mentor)	1	400.00	400.00 €
Preparation / Pauschale	1	500.00	500.00 €
Mentor fee/day	4	500.00	2,000.00 €
Assistant fee/day	4	300.00	1,200.00 €
2nd Assistant by ZKM	4	0.00	0.00 €
Materials	1	600.00	600.00 €
Total			5,000.00 €
2 days Internal Training on Art/Sci Workshopology			
Travel Expenses Dusseiller, Zurich, depends on scheduling	0	300.00	0.00 €
Travel Expenses in Europe (1 Extra Mentor)	1	400.00	400.00 €
Preparation / Pauschale	1	500.00	500.00 €
Mentor 1 fee/day	2	800.00	1,600.00 €
Mentor 2 fee/day	2	600.00	1,200.00 €
Materials	1	100.00	100.00 €
Total			3,800.00 €
Cancelled			0.00 €
Accommodation			
to be calculated and covered by ZKM	0	0.00	0.00 €

Biographies of the Core Team

Marc Dusseiller (CH)

Organisation, Education Research and Workshop Mentor

Dr. Marc R. Dusseiller is a transdisciplinary scholar, lecturer for micro- and nanotechnology, cultural facilitator and artist. He works in an integral way to combine science, art and education. He performs DIY (do-it-yourself) workshops in lo-fi electronics, hardware hacking, microscopy, music and robotics. He was co-organizing Dock18, Room for Mediacultures, diy* festival (Zürich, Switzerland), KIBLIX 2011 (Maribor, Slovenia), workshops for artists, schools and children as the former president (2008-12) of the Swiss Mechatronic Art Society, SGMK. In collaboration with Kapelica Gallery, he has started the BioTehna Lab in Ljubljana (2012 – 2013), an open platform for interdisciplinary and artistic research on life sciences. Currently, he is developing means to perform bio- and nanotechnology research and dissemination (Hackteria | Open Source Biological Art) in a DIY fashion in kitchens, ateliers and in developing countries.

J'aime Workshopology Network

Collaborators through a call inside the network is already ongoing.

Proposed Co-Mentors: Andy Gracie, Spela Petric, Antony Hall, Paula Pin, Robertina Sebjanic and more tba

Actioncy

Agentur für Workshops in zeitgenössischen Medien

Die Agentur Actioncy koordiniert Workshops mit Schwerpunkt in zeitgenössischen Medien. Dank der Vernetzung mit Partnerorganisationen und Communities verfügt die Actioncy über ein breites und erprobtes Kursangebot. Der kreative Umgang mit modernsten Technologien wird in handwerklichen Aktivitäten vermittelt. Die Kursleitung verfügt über grosse Erfahrung im Durchführen von technischen und gestalterischen Workshops.

Die Agentur Actioncy arbeitet mit Firmen, Schulen, Institutionen und Privatkunden zusammen und freut sich auf ihre Anfrage.

Hackteria Workshops

Extreme Places Extended Senses @ ANET
 PiksteriaLab 2014 - Bergen
 postgender body-hacks @ DanseFestival Barents
 Explorations in Bioluminescence - Ueber das Leuchten von Würsten
 Do-it-yourself von Laborgeräten in der Bioanalytik SATW
 Arte y Ciencia en el Mar
 BioTransLab @ aRtropocode - Summer of Labs, Galicia
 Mestna jaga: Helsingiški mestni zajec | Helsinki Rabbit Hunts
 Lick the Moonmilk
 Randen SummerLab 2014 -Forest-SoilGeeking or how to Fix-the-World
 Shake It Baby, HomeMade Kimchi @ KopenLab
 DIY Mikroskopie für SchülerInnen - Part of Hackteria Biologische Kunst
 Waterhackathon
 HackteriaLab 2014 - Yogyakarta
 Tourdigrade - BioElectronix for Artists and Geeks
 Tourdigrade - BioElectronix Hackathon and Performance
 BrainHacking vs. Larry's Tattoo Show @ SURVIVE!garage
 Solder Synth Sense Sore Sore Sip
 Do-it-yourself von Laborgeräten in der Bioanalytik SATW pre-workshop
 µFluidic Hackathon: Towards the Nail-Studio Lab-on-a-Chip Device
 FolkCulture Hackathon: OpenTraps, Wine @ Underes Ätzisloo
 BioHackerWerk @ Hyperwerk, Basel
 NanoHacking @ Biofilia, Aalto University
 Agar is the Media @ CynetArt, Dresden
 Cave µ-Safari 2: Jama Mačkovica
 Urban Ecology meets Artist's Kitchen, Schnegge Z'Nacht
 Cave µ-Safari in Vranja Jama
 BioTehna DIY microscopy @ Sajeta Festival
 Hackteria BioHacking Lab @ Share Cyberpunk Academy / REPUBLIKARijeka
 Hackteria Appenzeller Field Trip @ poolloop festival '13
